

Medium voltage protection covers forenergized Busbars, Insulators, Suspension clamps and Conductors from flash-overs due to contact from birds, squirrels and other wildlife.

The protective covers ACIC are available in different designs and sizes. They offer an effective encapsulation against accidental phase-to-phase or phase-to-ground contact caused by fauna and flora.

The Covers are made from a UV stable, track resistant, high performance material to ensure years of reliable service.

A variety of different shapes and sizes are available to cover circuit breaker bushings, bus standoff insulators, capacitors, transformer bushings, voltage regulators, potential transformers and more. Installation can be made quickly in the field by trimming the entry and exit holes to the required dimensions. The covers can be re-entered for other maintenance needs and then reused, thus lowering overall lifetime costs.

Features & Benefits:

- Excellent anti-tracking material characteristic.
- UV resistant.
- Suitable for polymeric / ceramic / hybrid insulators and suspension clamps.
- Designed to protect problem span areas.
- Cost-effective and variable design on particular application situations
- Easy to install
- Plastic rivets included
- Continuous operating Temperature shall be -40°C to 105°C
